Businesses world-wide have streamlined their operations and improved their efficiency with our innovative software solutions. Our flexibility in meeting our clients' ever-changing needs and our ability to provide unmatched, non-outsourced 24/7/365 technical support, has given us the edge as one of the most popular software development companies in the world. We invite you to browse our many software products and, if you don't find one to meet your needs, please let us know. In addition to developing some of the world's most popular industry-specific software products, our in-house software engineers can custom-develop a software solution to meet your needs.

TimeKeeper Connection

TimeKeeper Connection offers an easy to use administrative interface along with several methods for your employees to clock in and out, including a server-based timestamp for security and a special card reader based time stamp which uses bar coded cards as time cards. Includes special reporting features for vacation and sick time and provides support for remote operation, allowing your employees to clock in and out right over the telephone.

Property Connection

Manage your properties quickly and efficiently with the new standard in property management software. Property Connection allows you to easily utilize powerful property and tenant management features, in addition to a full-featured accounting system. With Property Connection, you'll be able to track rent activities, unit availability, vendor and contractor payables, and print over 100 property management and financial reports. Special customized reporting features included.

Salon Connection

As one of the most popular beauty salon software packages on the market today, Salon Connection tracks your clients' and your stylists' schedules, processes retail transactions, and manages all of your income activities, including inventory and vendors. This is an all-inclusive package and has everything needed to efficiently run your hair salon, spa, or nail salon.

Precinct Connection

Perfect for any size agency, Precinct Connection features the tracking of complaints, incidents, accidents, citations, tickets, warrants, property and storage, and field contacts and contains a complete business, names and vehicles cross-referencing system, along with complete state and local reports and NIBRs reporting. This comprehensive package includes support for multiple agencies.

Kennel Connection

As the world's leader in pet facility management software applications, Kennel Connection features boarding, grooming, daycare, training, and pet-sitting, as well as retail and point-of-sale, inventory control, accounting, and various management tools. Kennel Connection continues to set the industry standard for pet facility management software products.

Credit Card Connection

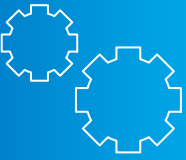

Our credit card processing package rivals that of other financial institutions in that our rates and fees are very competitive and no equipment leasing is required. In most cases, processed funds will be in your account within two business days. Transactions are encrypted and all major credit cards are processed right on your PC.
